## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 and 4-23 are allowed. The following is an examiner's statement of reasons for allowance:

The claimed invention is a hybrid integrated circuit device comprising:

- a hybrid integrated circuit substrate in which at least a surface is provided with insulation;
- at least a first electrode and at least a second electrode formed on the surface and being disposed to cover substantially the substrate;
- a light-emitting element connected with the first and second electrodes, the first and second electrodes configured to reflect light;
- a seal which is disposed in a periphery of the substrate; and
- a transparent substrate, which is fixed to the hybrid integrated circuit substrate via said seal to enclose the first and second electrodes and the light-emitting element within a sealed space formed between the hybrid integrated circuit substrate and the transparent substrate.

Reference Huang et al. disclose an active matrix OLED array formed between a semiconductor substrate and a transparent counter substrate having the first and second electrodes, where the periphery of the substrates is sealed to enclose the OLED array. However, Huang et al. do not disclose the first and second electrodes cover the entire substrate and configured to reflect light.

Art Unit: 2814

Therefore, Huang et al. do not disclose the claimed invention of the present application and claims 1 and 4-23 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
